Writing Instruments 2017
Novelties
Writing is a precious gift – pass it on

Writing helps us to understand others, and shows us new and different thoughts and ideas. Writing opens up the world.

But currently, one in four children has no access to education. To counter this we are continuing our work with The United Nations Children’s Fund (UNICEF). We are committed to building a world in which every child has a fair chance in life and we are working with them to help give children “the right to write”.

To achieve this, for every Meisterstück from the Gift of Writing Collection sold, a donation is made to UNICEF, which they invest in providing more children with a better quality of education. As a result, each time you use your UNICEF Collection Writing Instrument, you will know you have contributed in passing on this precious gift.

The Gift of Writing Collection takes its inspiration from the Rosetta Stone, an artefact created in 196 B.C. that was lost and then rediscovered in Egypt in 1799. Bearing the same text in Greek, Demotic and Hieroglyphs, it provided the key to unlocking ancient Egyptian writing.

The design also incorporates characters from the six most used modern alphabets. These are Roman/Cyrillic: “a”; the Mandarin character for “you”; the first letter of the Arabic alphabet; the Japanese vowel “a” from the hiragana writing system; the first consonant and vowel in Korean and the first character children learn in Hindi. They have been chosen because they are the first building blocks we use when we learn to read and write. All this is brought together in a seamless design emblematic of the universal nature and importance of writing.

Each writing instrument was built by a highly skilled craftsman. Each part of the collection brings its own individual approach, but most of all, each one is a celebration of writing and a sign of our commitment to the “Writing is a precious gift” concept – and we should all pass it on.

Education and the written language are gifts that can truly open up a child’s world.
The craft of writing

Painstaking attention is given to polishing and other embellishments, making each writing instrument a testament to true craftsmanship. The skilled hands of Montblanc’s craftsmen carefully set every part and every stone in perfect harmony.

The perfectly balanced weight, the smooth flow of the ink onto the paper – a Montblanc writing instrument delivers writing that is uniquely yours, leaving you to concentrate on what matters – what you want to write. Each is an icon of excellence, and much more besides. Every Montblanc writing instrument is also the product of many great minds and skilled hands.

Each one starts as an idea – a vision of how to advance the art and craft of fine writing. From these designers’ and engineers’ sketches, that idea is then brought to life. Whether it’s timelessly stylish or a truly futuristic design, the Maison’s master craftsmen have the experience, expertise and dedication to bring these visions to life in a writing instrument that is a testament to the importance of the written word.

The cap and barrel of each writing instrument is made to measure from materials such as precious resins, sterling silver and ebonite. Expertly worked finishes for the body’s surface and gold, platinum, ruthenium or rhodium coatings for the fittings give each writing instrument a distinctive character.

The heart and soul of every Montblanc Fountain Pen is its nib. Made from either precious Au 750 or Au 585, each is painstakingly handcrafted in a complex of 35-step process. Under pressure of up to 18 tonnes, the nib’s silhouette is stamped out and then carefully pressed into shape. After adding the exceptionally hard iridium tip, Montblanc craftsmen accurately grind the nib by hand to its final width and size.

Classic Montblanc nibs are adorned with the emblematic 4810 engraving. This is an allusion to the height of Mont Blanc in metres and a symbol of the Maison’s highest standards. Some editions and collections may feature special embellishments, but after final assembly and setting, every nib must pass a thorough, rigorous writing test to ensure that it delivers the ultimate writing experience for you. Only after all this has been accomplished, is a Montblanc Fountain Writing Instrument deemed ready to become your trusted lifetime companion.
Montblanc supports UNICEF
Meisterstück Solitaire Skeleton 149

The Meisterstück 3D Skeleton 149 brings together all the design elements behind our collaboration with UNICEF.

Its cap and barrel are made from a special blue resin that matches UNICEF’s characteristic colour. The platinum-coated tube is accurately turned and milled to create 3D calligraphy. Together they capture the beauty and individuality of different calligraphies while symbolising the importance and universality of writing. The cap top is made of mother-of-pearl and onyx and carries a precious 2.5 mm blue sapphire as a symbol of the UNICEF partnership.

The handcrafted Au 750 white gold nib carries bi-colour letters from the six most used alphabets in the world. Platinum-coated fittings complete the exquisite appearance of this Skeleton piece.
Montblanc supports UNICEF
Meisterstück Solitaire Blue Lacquer

The Solitaire Blue Lacquer takes its design inspiration from the Rosetta Stone. This exceptional artefact was created in 196 B.C. but was lost and then rediscovered in Egypt in 1799. It provided the key to understanding the Egyptian alphabet and civilisation.

The cap and barrel are made of a precious blue lacquer that reflects UNICEF’s characteristic colour. These, together with the cap top, are finely engraved with six letters from the most used alphabets in the world. It also carries a precious 1.9 mm blue sapphire as a symbol of our UNICEF partnership.

A handcrafted Au 750 bi-colour solid gold nib and platinum-coated fittings complete the exquisite appearance of this writing instrument.
Montblanc supports UNICEF
Meisterstück Solitaire Platinum-Coated Doué

Like the other models in the UNICEF collection, the Meisterstück Doué, a subtle blend of the ancient and modern, has the motto “Writing is a precious gift. Pass it on.”

The contemporary feel of the metal cap is contrasted with a finely engraved design inspired by the Rosetta Stone. The engraving on the cap top is made up of letters from the six most used alphabets in the world. Together they capture the beauty and individuality of different calligraphies, while symbolising the importance and universality of writing. The cap top carries a precious 1.3 mm blue sapphire as a symbol of the UNICEF partnership.

A highly polished, precious black resin barrel, handcrafted and rhodium-plated Au 750 solid gold nib, and platinum-coated fittings complete the understated style of this writing instrument.
Montblanc supports UNICEF
Meisterstück Platinum-Coated LeGrand

As a symbol of the Montblanc tradition of constant innovation we have created this iconic Meisterstück, a new interpretation of our most iconic writing instrument.

The cap carries a precious 1.6 mm blue sapphire and a special engraving of six letters from the most used alphabets in the modern world. The two are combined to celebrate the ongoing collaboration between the Maison and UNICEF.

We have worked together for many years to bring to life our shared belief in the power of the written word. The handcrafted Au 585 solid gold nib, crowned by the unique “4810” engraving, represents the height of Mont Blanc in metres and serves as a metaphor of our craftsmen who constantly reach for new heights. A highly polished precious black resin barrel and platinum-coated fittings complete this timeless symbol of self-expression.

Montblanc Heritage Rouge et Noir
Solitaire Serpent Limited Edition 1906

The Heritage Rouge et Noir Solitaire Serpent is inspired by the original metal and silver pens, which were treated with special techniques in the 1920s.

The barrel and cap are made from platinum-coated, brushed brass. The cap top has a Montblanc emblem of coral and ivory-coloured precious resin. A champagne-tone gold-coated serpent clip with cognac-coloured garnets set in the eyes winds gracefully around the cap. This motif is continued with an engraved serpent winding around the barrel, cone and forepart. The handcrafted Au 750 solid gold nib with partly rhodium-coated serpent design adds a final flourish to this exceptional writing instrument.
The first Montblanc Fountain Pens eliminated the risk of ink stains and so were given the sobriquet “Rouge et Noir” referring to the safest way of playing roulette: betting on both red and black, at the same time.

In this reinterpretation, the resin cap and lacquer barrel are made in vintage brown. Vintage brown is the name given to the patina of colour obtained by ebonite naturally aging in the tropical sun. Here the deep chocolate shade is used as an interpretation of that tropical aging. The cap top is crowned by the Montblanc ivory snow-cap set in coral. A champagne tone gold-coated serpent clip with matching cognac-coloured garnet eyes winds gracefully around the cap.

This classic tribute to Montblanc’s pioneering history is available as a Rollerball, a Ballpoint and as a piston Fountain Pen, which features a handcrafted Au 585 solid Gold nib with serpent embossing.

Montblanc StarWalker
Montblanc StarWalker
Spirit of Racing Doué

The Spirit of Racing collection brings a sporty edge to the StarWalker Collection. The collection is inspired by performance. It captures the masculine energy and style of the glory days of racing.

The pattern on the precious resin barrel draws inspiration from the tread of racing tyres. The barrel, which is moulded then blasted, gives a rubber-like look and feel contrasting with the shiny platinum-coated cap and fittings. The forepart of the writing instrument features a knurling pattern inspired by those used in racing car gearshifts, pedals and steering wheels.

This design feature can also be found on the crown of the TimeWalker Timepieces Collection.
Montblanc StarWalker
Ceramics Doué White

The distinctive pattern on the StarWalker Ceramic Collection is inspired by “Italian futurism”, a design movement from the early 20th century emphasizing the visual effect of motion, aerodynamics and speed. Its founders were fascinated by velocity and motion, bustling cities, racing cars and the newly discovered aviation.

A dynamic pattern, depicting movement, stretches across the white ceramic barrel and the platinum-coated metal cap. The ceramic used in the collection is a high-performance material that is also used in racing cars, and can withstand temperatures of up to 2,400 °C and has a high resistance to abrasion and scratches.

Discover precision, resistance and ultra-performance in an aerodynamic and sleek design.

Montblanc Augmented Paper
Montblanc supports UNICEF
Augmented Paper

Writing is a precious gift – even in a digital world.

Montblanc Augmented Paper is as simple as it is practical. You write on traditional paper, and then your writing and sketches are effortlessly recorded by the digitiser hidden in the luxury leather envelope. With one click you can transmit them to your mobile device. The Montblanc Hub app even lets you convert handwritten notes into digital text, edit and share your files via email, or store them in your cloud service.

As part of our collaboration with UNICEF we have created the Montblanc Augmented Paper UNICEF Edition. It is a unique set comprising: a paper notebook, an adapted Montblanc StarWalker Ballpoint Pen and a stylish blue leather envelope. The inner pocket is embossed with letters from the six most used alphabets in the world.

It takes the craft of writing into the digital age while reaffirming the belief that writing is a precious gift that we can all pass on.

Montblanc M Ultra Black

From the beginning, the founders of Montblanc have always placed a high value on sophisticated design executed with immaculate craftsmanship. It is in this spirit that we are continuing to work alongside one of the most influential designers of his generation: Marc Newson.

His M Collection has a sculptural quality with flowing lines and no sharp edges. The latest addition to the M Collection is the Montblanc M Ultra Black. Crafted from precious black resin – the body has a sleek non-reflective surface. Black colouring is used across many Montblanc writing instruments, but it is the unique matt tone that adds a new shade to the M edition. A discrete ring of orange on the forepart pays homage to Marc Newson’s distinctive signature colour. This contrasts with the ruthenium-coated elements of cap, clip, trim and the forepart of the handcrafted Au 585 gold nib.

It is a combination of minimalism and modernity that makes the M Ultra Black so individual.

Montblanc Bonheur
Montblanc Bonheur

In the 1920s, the French fashion revolution freed women from restrictive styles, opening their wardrobes to more functional yet elegant designs. This is the inspiration behind the Bonheur Collection and builds on the Maison’s long history of creating beautiful writing instruments for women.

Following the philosophy and style of the era, the writing instrument’s shape is pure and simple, but with feminine lines. The clip revives the “teardrop” design of the 1920s. Black and white precious resin combined with platinum-coated fittings adds flair to functionality – a perfect match for a hectic yet chic lifestyle. The Au 585 gold nib is engraved with an “étoile filante” design. Because, for the French, the falling star is emblematic of “le Bonheur” – happiness.

To go with the Montblanc Bonheur, we suggest the white Sartorial leather pouch to add a touch of edgy glamour and femininity.

Writing Accessories

Every part of the Gift of Writing Collection is a celebration of writing and a sign of our commitment to UNICEF and our ambition to pass on the gift of writing to children around the world.

This extends to every item in the collection of writing accessories. Our special edition notebook features fine embossing on the cover that incorporates the first letters children learn at school in the six most used alphabets in the world. The light blue bookmark matches the UNICEF colour and silver cut edges provide the perfect canvas for writing with the special UNICEF blue ink available in specially packaged bottles, cartridges and refills.

The elegant dark blue leather of the cover is adorned with embossing of letters from the worlds alphabets and the Montblanc emblem in a palladium-coated ring.

Montblanc Augmented Paper App

Linking the Beauty of Handwriting to the Digital World.

Discover a brand new writing innovation that integrates traditional writing into the digital workflow. With Montblanc Augmented Paper, written notes and sketches can be transferred from paper to digital devices with the simple press of a button. Once on the device, the content can be edited, shared with others and translated into digital text to increase productivity and performance. Bringing together the best of both analogue and digital worlds, Augmented Paper proves the enjoyment of a natural Montblanc writing experience on real paper with the efficiency of digitising work.

The diamonds featured on every Montblanc gem-set product have been purchased by Montblanc from legitimate sources not involved in the funding of conflicts and in compliance with United Nations Resolutions/The Kimberley Process certification system (System of Warranties). Montblanc hereby guarantees that these diamonds are conflict-free, based on personal knowledge and/or written guarantees provided by the supplier of these diamonds. The Montblanc Diamond is a patented diamond cut. Montblanc products are only available in Montblanc boutiques and from specialised retailers authorised by Montblanc with due consideration to the product category.
