Montblanc Timepieces 2018

160 years of innovation .................................................. 4 – 5
Two manufactures. One passion ......................................... 8 – 9
The Montblanc 500 hours test: certified perfection .................. 10 – 11
Exo Tourbillon and Chronograph ...................................... 12 – 13
Montblanc 1858 ................................................................. 14 – 39
Montblanc Star Legacy ....................................................... 40 – 63
Montblanc TimeWalker ....................................................... 64 – 75
160 years of innovation.
Montblanc’s watchmaking tradition began 160 years ago, when in 1858 Charles-Yvan Robert founded a watch workshop in the Saint-Imier valley, starting the Minerva era. Today, Minerva is home of the Montblanc Manufacture in Villeret. In its heyday it was one of the leading specialists in professional watches for measuring small intervals of time with high precision.

As early as the 1880s, the Manufacture had started to specialise in pocket watches that could be wound with a crown. They were among the first to be wound without a separate key and the reason why Minerva experienced success and expansion early on. The innovative timepieces also attracted attention at various world exhibitions of the time, winning prestigious awards.

At the beginning of the 20th century, the Manufacture started to develop monopusher chronographs and gained recognition for its precise chronometry, becoming a leading specialist in the fabrication of professional watches and stopwatches. Minerva shaped the history of professional timekeeping in a way that few other watch manufactures did.

The journey to new heights continued throughout the 20th century with multiple achievements, innovative patents and trailblazing timekeeping technology, resulting in highly precise stopwatches that kept time exact to the 1/100th of a second.

Those developments symbolise the level of mastery and innovation obtained by Minerva since 1858, and consolidate its reputation in the manufacture of pocket watches and chronographs.

The Montblanc timepieces of today continue the journey of the 160-year Minerva legacy in three fine watchmaking explorations: the 1858 Collection, the Star Legacy Collection and the TimeWalker Collection.
Star Legacy Collection

With the “Star Legacy”, Montblanc pays tribute to Minerva’s iconic pocket watches, while keeping the key elements of legendary timepieces like the gold Hunter Pocket Watch. The collection continues the journey of classical fine watchmaking with modern design and enhanced finishes.
Montblanc 1858 Collection

In the 1920s and 1930s, Minerva pocket watches were meant for military use and tough mountain explorations. The 1858 collection captures this explorer’s spirit from the past and gives it a classic, yet modern shape.

TimeWalker Collection

Paying tribute to Minerva’s extraordinary heritage, Montblanc journeys back to the glory days of motor racing with timing instruments that capture the beauty, spirit and values of motor racing history. These professional watches from the TimeWalker collection are a fascinating testament to sheer performance and innovation.

Centuries of collected knowledge, decades of experience, years of development and hundreds of hours of dedicated labour – they all culminate in a Montblanc timepiece coming to life. With their skills and knowledge handed down through generations, the watchmakers at the Montblanc Manufactures in Villeret and Le Locle put their pride, passion and soul into each timepiece.

Two manufactures. One passion.

As the former home of Minerva, the Montblanc Manufacture in Villeret upholds the Manufacture’s legacy of expertise. Here, Montblanc’s Movement and Innovation Excellence Centre continues to enrich fine Swiss watchmaking with groundbreaking innovations. Following in the footsteps of Minerva, the watchmakers developed a suspended Exo Tourbillon that features a balance wheel floating above the dial. This watchmaking expertise gained from high complications is also applied to the creation of highly functional small complications.

In the Manufacture’s ateliers, all the movements’ components are carefully crafted and decorated by hand using traditional methods. The watchmakers chamfer every edge, polish even the tiniest wheel and adorn plates and bridges with the traditional circular graining and “Côtes de Genève” stripes. Their great dexterity and skill are also indispensable in crafting delicate balance springs, an accomplishment only very few watch manufactures manage. The Manufacture in Le Locle is Montblanc’s Watch and Quality Excellence Centre, where traditional watchmaking merges with the latest technologies. From aesthetical design to construction and prototyping, all the expertise necessary to create an iconic timepiece is concentrated here.

Manifested in a superior level of craftsmanship and timelessly elegant design codes, the horological knowledge of the two manufactures is deeply embedded in all Montblanc timepieces, passing on the passion for fine watchmaking from grand complication timepieces to refined three-hand watches.
Once the carefully orchestrated interplay of countless parts is skilfully put together, the mark of distinction for a newly created Montblanc timepiece is passing the rigorous testing procedure of the Montblanc Laboratory Test 500. The Montblanc 500 hours test: certified perfection.

For 500 hours, the timepieces are subjected to a variety of extreme conditions: daily life’s wear and tear, water resistance, numerous settings and re-settings, different climatic conditions, as well as a check of all their specific functions. It is a demanding and tough procedure that guarantees the functionality of even the technically most complex features, such as the new world-time complication featured in the 1858 Geosphere. All 1858 watches are tested for maximum reliability and are water resistant up to 100 m. Only once the quality assurance team at the Montblanc Manufacture in Le Locle is convinced that a watch upholds Montblanc’s strict quality standards do they release it for subsequent delivery. Each watch that passes the Montblanc Laboratory Test 500 is issued with an individual test certificate – labelling it worthy of Montblanc’s strict and high-quality standards.
Montblanc’s perpetual passion for technical excellence feeds into every detail of our timepieces. This quest is epitomised by two strong technical pillars.

**EXO TOURBILLON**

A milestone in the journey of excellence in fine watchmaking was the patented Exo Tourbillon. It required three years of development and is especially recognisable by the large balance wheel with screws, which is positioned outside of the tourbillon’s rotating cage. The noticeable fascination of the first Exo Tourbillon was that anyone looking at the watch was able to appreciate the beauty of the large balance wheel with its slow turning motion of 18,000 oscillations per hour. The two solid gold pillars equilibrating the cage also catch the eye. But besides its beauty it was also technologically groundbreaking: the watchmakers implemented an extra long axis with a highly precise balance. And furthermore, the innovative mechanical architecture saves energy compared to a conventional tourbillon since it weighs less. To accomplish this, the engineers developed a smaller and lighter cage and freed it from the weight of a balance wheel. The balance is positioned outside of the rotating cage causing it to be unaffected by the inertia of the cage, and therefore improving its precision.

**CHRONOGRAPH**

The technical foundation for our present-day know-how in chronographs was laid in 1909. Back then, Minerva was one of the few manufactures to produce movements equipped with chronograph functions, such as the famed Calibre 19.09 (19 lines/launched in 1909), featuring the iconic V-shaped bridge whose design would be protected three years later in 1912. In the 1920s, Minerva invented one of the first manually wound monopusher chronographs, developed especially for wristwatches, marking a new chapter in the Manufacture’s history. It featured the V-shaped bridge, a column wheel, and a horizontal coupling – beating at the traditional frequency of 18,000 A/h. Soon the Monopusher Chronograph Calibre 17.29 followed, which was admired for its elegant slimness.
A tribute to true adventurers.
The Montblanc 1858 collection finds its inspiration in the world of mountain exploration. It is a reinterpretation of the Minerva pocket watches and chronographs from the 1920s and 1930s that were meant for the military and mountaineers — boasting high accuracy, legibility and robustness for use in extreme conditions.

The new Montblanc 1858 watches evoke the spirit of the past in a modern way, expressing the trends of going back to nature and discovery. The new vintage exploration-inspired timepieces feature distinctive aesthetics, innovative complications, a mix of carefully selected materials and a choice of different case sizes — combining high-quality materials such as an alloy of bronze that evolves over time with novel and useful in-house complications, such as the world-time featured in the 1858 Geosphere timepiece. These watches are designed for the modern-day explorer who likes to set his own challenges. A man whose authentic demeanour and style, love of the unknown and ease with nature allow him to reach new heights — literally and figuratively.
Celebrating the 160th anniversary of Minerva, the Montblanc 1858 Geosphere honours the heroes of mountain climbing with a professional-grade, innovative timepiece. Built for those who travel the world in their perpetual quest for exploration, it expresses respect for true mountaineers as it is dedicated to the Seven Summits Challenge – the holy grail of climbers. To date, less than 500 athletes have managed this feat: reaching the highest peak of each continent. The combination of materials such as steel and ceramic underlines the high quality and exclusiveness of this timepiece.

On the dial, the world’s seven summits are marked with red dots on two turning globes and they are also engraved on the case back. The timepiece features a new manufacture world-time complication developed by the Montblanc watchmakers in Villeret: two domed globes that complete a full rotation in 24 hours as they turn in opposite directions. Both are surrounded by a scale with the 24 time zones, along with a day and night indication in contrasting colours. This provides an instinctive way of appreciating the different time zones, aided by SuperLumiNova® applied to the continents for increased visibility and performance at night.

**Montblanc 1858 Geosphere**

- **Ident No.:** 119286
- **Movement type:** Automatic
- **Calibre:** MB 29.25, with manufacture complication
- **Indications:** Hours - minutes - date
- **Case:** Stainless steel, domed sapphire crystal with double anti-reflective coating
- **Case back:** Stainless steel case back with special “Spirit of Mountain Exploration” engraving
- **Dial:** Black dial with beige luminescent numerals
- **Hands:** Luminescent rhodium-coated hours and minutes hands; luminescent beige second time zone hand
- **Dimensions:** 41.5 mm, 12.8 mm
- **Strap:** Calfskin strap coming from the Montblanc Pelletteria in Florence, Italy, stainless steel triple-folding clasp
- **Water resistance:** 10 bar (100 m)
The Montblanc 1858 Pocket Watch Limited Edition honours the 160th anniversary of Minerva with its new Manufacture Calibre MB M16.24, a beautifully hand-crafted monopusher movement with the iconic V-shaped bridge and Minerva arrow, directly inspired by the historic Minerva Monophuser Chronograph Calibre 17.29 for pocket watches. Designed for mountain explorers, this ultimate and versatile timepiece offers the unique opportunity to appreciate time in different ways while discovering new adventures. The pocket watch can be positioned on a table with a stand or combined with a built-in compass that can be accessed by opening it up to lay flat on a map for planning adventures. The back of the compass features an engraving of the four cardinal points, which are enhanced with SuperLumiNova®.

Over 50 elements compose the versatile and adaptable case. It can be transformed into a wristwatch that can be safely worn on the forearm during explorations or comfortably be held-in-hand – thanks to a unique brown sfumato aged calfskin strap with two pin buckles and a cover. The 60 mm pocket watch is made of grade-two titanium and combines polish and satin-finishing. It features a unique red central hand coated with SuperLumiNova® indicating the time on a 24-hour scale and a dedicated minute track. The dial offers high readability and performance during the day and at night. It is crafted from Dumortierite stone, named after famed French explorer Eugène Dumortier, who discovered it in the Alps mountain chain in 1881. This natural mineral gives the dial a unique blue lustre.

Montblanc 1858 Pocket Watch Limited Edition – 100 pieces

Ident No.: 118485
Movement type: Manually wound monopusher chronograph
Calibre: MB M16.24
Indications: 24-hour display with minutes indication – seconds
Case: Titanium, domed sapphire crystal
Case back: Sapphire crystal case back and compass
Dial: Blue Dumortierite stone with beige luminescent indexes and numerals
Hands: Luminescent red hours and minutes hand; white chronograph seconds hand; white counters hands
Dimensions: 60 mm, 20.80 mm
Water resistance: 3 bar (30 m)
Limitation: 100 pieces

Limited Edition
The new Montblanc Manufacture Calibre MB M16.24 showcases fine watchmaking down to the very last detail. Inspired by the Minerva Monopusher Chronograph Calibre 17.29 of a size of 17 lines (circa 38 mm) developed in 1929 and reworked in the 2000s as the Calibre MB M16.29. The new version allows the indication of time on a 24-hour scale on a dedicated minute track thanks to an exclusive and unique red central hand coated with SuperLumiNova®. This hand-crafted monopusher chronograph movement is composed of a large balance wheel with 18 screws beating at the traditional frequency of 18,000 A/h as well as a column wheel and horizontal coupling. It features the iconic V-shaped chronograph bridge and the Minerva arrow, paying tribute to its heritage. The bridges are decorated with “Côtes de Genève”, circular graining on both sides and hand-chamfered edges – a perfect example of fine watchmaking.

The Montblanc 1858 collection vintage codes are directly rooted in the spirit of adventure and exploration, their distinctive designs being reminiscent of the original Minerva chronographs from the 1920s and 1930s.

The satin-finished cases have been slightly reworked with horns that have been slimmed down thanks to polished, bevelled edges that underline their shape. Fluted crowns are reminiscent of period timepieces and domed sapphire crystal glass boxes increase the robustness and vintage appeal of each watch.

In order to verify the performance of the collection, all Montblanc 1858 models undergo the Montblanc Laboratory Test 500 during which mechanics and materials are tested for maximum reliability under extreme conditions. All 1858 models are also water resistant: the Automatic, Chronograph and Geosphere models up to 100 metres, the Pocket Watch Limited Edition up to 30 metres.
Destined to master challenges.
The Montblanc 1858 Monopusher Chronograph Limited Edition possesses a 13.21 calibre – a direct heir of the iconic Calibre 13.20, which was developed by Minerva in the 1920s specifically for use in a wristwatch. This timepiece is part of the Montblanc 1858 Collection and an epitome of vintage chronograph design with its 40 mm stainless steel case. Reinforcing the vintage look, it features an original smoked-green dial and matching green alligator strap with beige stitching, coming from the Montblanc Pelletteria in Florence, Italy. Reminiscent of the iconic Minerva chronographs, it features a bi-compax dial with a small seconds counter at 9 o’clock and a chronograph 30-minute counter at 3 o’clock, as well as a tachymeter scale on the outer part of the dial.

Akin to all other timepieces, the 1858 Monopusher Chronograph is characterised by its sapphire crystal glass box, domed resized cathedral-shaped hands with SuperLumiNova®, luminescent Arabic numerals and the historic Montblanc logo. On the case back, the sapphire crystal reveals the intricate beauty of the Montblanc Manufacture Monopusher Chronograph Calibre MB M13.21.

**Montblanc 1858 Monopusher Chronograph Limited Edition – 100 pieces**

- **Ident No.**: 117834
- **Movement type**: Manually wound monopusher chronograph
- **Calibre**: MB M13.21
- **Indications**: Central hours and minutes – seconds at 9 o’clock
- **Case**: Stainless steel, domed glass box with anti-reflective coating
- **Case back**: Sapphire crystal case back
- **Dial**: Smoked green with beige luminescent numerals
- **Hands**: Luminescent rhodium-coated hours and minutes hands; white chronograph seconds hand; white counters hands
- **Dimensions**: 40 mm, 12.15 mm
- **Strap**: Alligator-skin strap coming from the Montblanc Pelletteria in Florence, Italy, stainless steel pin buckle
- **Water resistance**: 10 bar (100 m)
- **Limitation**: 100 pieces
Paying tribute to the historical Calibre 13.20, which was the first fully integrated chronograph movement of Minerva specially developed for use in a wristwatch in 1920, the MB M13.21 features the iconic V-shaped chronograph bridge, whose design was protected in 1912, along with the iconic Minerva arrow decorated by hand. It is composed of a large balance wheel with 18 screws beating at the traditional frequency of 18,000 A/h, column wheel and horizontal coupling for fine watchmaking performance.

Montblanc Manufacture Calibre MB M13.21

Ident No.: Montblanc Manufacture Calibre MB M13.21
Movement type: Manually wound monopusher chronograph
Dimensions: Diameter 29.50 mm, height 6.40 mm
Number of components: 239 components
Power reserve: Approx. 55 hrs
Movement balance: 18,000 vibrations per hour (2.5 Hz)
Balance: Screw balance, Ø 11.40 mm, 26 mg.cm²
Plates: Rhodium-plated German silver, circular-grained on both sides, hand-chamfered edges

Bridges: Rhodium-plated German silver, “Côtes de Genève”, recesses circular-grained on both sides, hand-chamfered edges
Going train: Wheels: Gold-plated, circular-grained, chamfered, diamond hubs on both sides
Pinions: Polished faces and tooting, burnished pivots
Indications: Central hours and minutes – seconds at 9 o’clock
The Montblanc 1858 Automatic Chronograph combines pure aesthetics with functionality and boasts the precision of the chronographic functions. As a first, the Montblanc 1858 Automatic Chronograph introduces bi-pushers to the line to activate the Chronograph. Its 42 mm case has undergone both polished and satin-finishing and comes with a sapphire crystal glass box, highlighting the robustness and contemporary look of the watch. Engraved in the case back are a compass, two crossed ice pickaxes and the emblematic Mont Blanc mountain – the iconic peak that inspired the Maison since its founding. Being black, the dial provides an elegant backdrop for the bi-compass counters positioned at 3 and 9 o’clock, reminiscent of Minerva’s historic chronographs. The dial is completed with luminescent Arabic numerals and cathedral-shaped hands that are slightly domed and have been enhanced with beige SuperLumiNova®. A high-quality lined, black and grey “NATO” strap completes the contemporary design.

Montblanc 1858 Automatic Chronograph

Montblanc 1858
Automatic Chronograph
The Montblanc 1858 Automatic features all the distinctive codes of the line while introducing a smaller case size. With its pure design and high readability, the vintage-inspired dial is especially reminiscent of the Minerva heritage. Housed in a 40-mm stainless steel case with slim curved horns featuring polished and satin-finishing, the Montblanc 1858 Automatic has been enhanced with a bronze bezel and fluted crown, creating a distinctive vintage look. A picture of the Mont Blanc has been engraved on the case back, along with a compass and two crossed ice pickaxes, which further celebrate the spirit of mountain exploration and the iconic peak. The Montblanc 1858 Automatic features a new interpretation of the historical Minerva timepieces with a black dial and beige luminescent Arabic numerals as well as precise railway minute tracks. For a high legibility and refinement, the luminescent cathedral-shaped hands are slightly domed.

Water resistance: 10 bar (100 m)
Montblanc
1858
Automatic
At eye level with your aspiration.
Each Montblanc 1858 timepiece is unique, thanks to the use of ageing materials such as bronze cases or aged calfskin leather straps. Very few Maisons have the knowledge and skills to source skins from tanneries and transform them into fine quality leather straps like the Montblanc Pelletteria, our Maison’s centre of leather excellence where ancestral craftsmanship, state of the art technology and enduring design come together.

This expertise allows it to develop distinctive vintage straps matching the aesthetical codes of the Montblanc 1858 collection. The watches are also available with high-quality woven “NATO” straps for a unique, contemporary look. These straps are hand-crafted in France at a traditional weaving manufacture in production for over 150 years. Thanks to this artisanal know-how, the “NATO” straps are refined, robust, durable and yet extremely comfortable on the wrist.

Montblanc Star Legacy
Paying tribute to the extraordinary Minerva heritage that dates back to 1858, Montblanc reinterprets the iconic Star Collections with the new Star Legacy, enhancing the level of classical finishing and sophistication of the design while keeping the key elements. The Maison brings its manufacture expertise to new exclusive in-house complications that push the boundaries of fine watchmaking. Inspired by Minerva pocket watches, the new Star Legacy timepieces feature round cases with a curved finish, giving a refined pebble-shaped effect, along with horns that have steps on the sides. In the spirit of classical watchmaking, the crowns stand out with their recognisable and easy-grip onion shape, adorned with the Montblanc emblem. The dials are highlighted by prominent Arabic numerals. Their shape and size have been redesigned and refined. Other aesthetical details include a unique railway minute track and a beautiful exploding star pattern guilloché on the dial. With a variety of sizes and a large choice of straps, the line is the perfect way for watch connoisseurs to express their personal style.
The beginning of a new classic.
The Montblanc Star Legacy Suspended Exo Tourbillon Limited Edition 58 demonstrates the mastery of classic and traditional artisanal aesthetics while pushing the boundaries of fine watchmaking. The massive balance wheel is raised 3.2 mm higher than the dial and appears to be floating. Due to its asymmetric construction, the alignment of the Exo Tourbillon bridge, with its solitary arm, represents a horological challenge and demands a high level of skill and dexterity to complete. Following pure horological tradition, the manufacture movement Calibre MB M16.68 is entirely decorated in the Montblanc Manufacture in Villeret with hand-crafted finishings such as “Côtes de Genève” stripes, inner angles, circular graining, beveling and a mirror-polished pawl with the hand-finished Minerva arrow.

Inspired by the three-dimensional bridge construction, the round shape of the case, with its domed sapphire crystal on the front, has been built around the movement, contributing perfectly to the overall design. The sophisticated three-dimensional dial of the Montblanc Star Legacy Suspended Exo Tourbillon Limited Edition 58 is constructed in eight different parts that have been decorated entirely by hand using traditional watchmaking techniques. The base is in 18K gold and has been highlighted with a hand-made guilloché pattern in places and a sandblasted decoration in others, with polished steps framing the different finishing techniques.

Montblanc Star Legacy Suspended Exo Tourbillon Limited Edition – 58 pieces

Limited Edition
Montblanc reinterprets its Nicolas Rieussec Monopusher Chronograph, which was launched in 2008 and has become a true Montblanc icon. The dial of the timepiece has been redesigned while keeping its distinctive look, with the chronograph’s turning discs and off-centre dial. This Montblanc Star Legacy Chronograph is named after Nicolas Rieussec, who invented the first inking chronograph in 1821. In this new version, the dial has been entirely reworked. The off-centre hour circle and the chronograph’s titanium turning discs have been domed, giving them a three-dimensional effect. Reminiscent of Minerva pocket watches, the Rieussec Chronograph features a newly designed, round case of 44.8 mm, curved finishing on the sides, and horns that have steps on the sides. It is powered by the iconic Manufacture monopusher chronograph movement with automatic winding. The MB R200 calibre is equipped with a column-wheel mechanism that controls the monopusher chronograph. The shape of the calibre can be admired through the sapphire crystal case back with its components that are decorated with Geneva stripes and feature bevelled, polished edges. The timepiece is equipped with two rotating horizontally aligned discs for the monopusher chronograph’s 60-second and 30-minute counters, which turn below a blued fixed double index, as on the original 1821 device. Additionally, a second time zone is displayed via a skeletonised hand on the off-centre dial.

Montblanc Star Legacy Nicolas Rieussec Chronograph

Ident No.: 118537
Movement type: Monopusher chronograph with automatic winding
Calibre: MB R200
Indications: Off-centre hours – minutes hands, second time zone by hand, date and day and night displays
Case: Stainless steel, domed sapphire crystal with anti-reflective coating
Case back: Sapphire crystal case back
Dial: Silvery-white dial with black Arabic numerals and titanium counters
Hands: Blue-coloured hours and minutes hands; skeleton rhodium-coated second time zone hand; blue-coloured counter hand
Dimensions: 44.80 mm, 15.02 mm
 Strap: Alligator-skin strap coming from the Montblanc Pelletteria in Florence, Italy, stainless steel triple-folding clasp
Water resistance: 3 bar (30 m)
Montblanc
Star Legacy
Nicolas Rieussec
Chronograph
The Montblanc Manufacture calibre MB R200, which first powered the iconic Nicolas Rieussec Monopusher Chronograph launched in 2008, is a fully integrated chronograph with an array of technical feats. It was specially developed to master this complication and features traditionally crafted finishes. This self-winding mechanical calibre features a column wheel that controls the monopusher chronograph. The connection between the gear train and the chronograph’s wheels is alternately engaged and disengaged thanks to a vertical coupling, which ensures a smooth start and prevents the elapsed time discs from jumping when the chronograph is switched on. For relentless performance, the movement has two barrels that store enough energy for 72 hours of power reserve. Red jewels, blued screws and gold-coated wheels complete the ensemble. It allows the display of two rotating horizontally aligned discs for the monopusher chronograph’s 60-second and 30-minute counters, which turn below a blued fixed double index, as on the original device.

### Montblanc Manufacture Calibre MB R200

- **Ident No.:** Montblanc Manufacture Calibre MB R200
- **Movement type:** Monopusher chronograph with automatic winding
- **Dimensions:** Diameter 31.00 mm, height 8.46 mm
- **Number of components:** 319 components
- **Power reserve:** Approx. 72 hrs
- **Movement balance:** 28,800 vibrations per hour (4 Hz)
- **Balance:** Screw balance, Ø 9.7 mm, 12 mg cm²
- **Plates:** Rhodium-plated and circular-grained plates

**Bridges:** Rhodium-plated bridges with Geneva stripes

**Going train:** Wheel train with special toothing for a more efficient power transmission

**Indications:** Off-centre hours – minutes hands, second time zone by hand, date and day and night displays
The Star Legacy Automatic Chronograph aesthetic design codes allude to the history of classical fine watchmaking and the Minerva heritage – combining them with a practical chronograph function. The pure silvery-white dial contains balanced proportions between the aesthetic elements and the timekeeping functions. It features redesigned black Arabic numerals, classic blued leaf-shaped hands and a refined filet sauté. The unique railway minute track encircling the dial and counters completes the timepiece’s historically elegant design. Equipped with the automatic movement Calibre MB 25.02, the Star Legacy Automatic Chronograph indicates the hours, minutes, seconds and date as well as the chronograph’s indications with central hand and counters.

The timepiece comes in a rounded 42 mm stainless steel case with curved horns and steps on the side, an onion-shaped crown with the Montblanc emblem, and a curved finish on the side of the case itself, giving it a refined pebble effect. The Automatic Chronograph is completed with a new blue sfumato alligator leather strap coming from the Montblanc Pelletteria in Florence, Italy.

Star Legacy
Automatic
Chronograph
The Star Legacy Automatic Date 39 radiates pure elegance and exhibits all the attributes of classical watch-making. It features all the codes of the collection: this includes Arabic breguet numerals, leaf-shaped, rhodium-coated hands and the distinct curved line of the case. The dial stands out with its exploding star pattern guilloché and the unique railway minute track with dots instead of the traditional lines. A further mark of distinction is the exquisite alligator leather strap. The Star Legacy Automatic Date comes with a 39 mm case made from stainless steel and sapphire glass with an anti-reflecting coating.

- **Water resistance:** 3 bar (30 m)
Montblanc Star Legacy
Automatic Date
39 mm
The Star Legacy Moonphase displays its extraordinary class from case to dial. It features one of the classic complications of watchmaking: a moonphase combined with a date. Due to detailed refinements concerning the proportions of the dial the aesthetical elements and functions are presented in the most sophisticated way: Arabic breguet numerals, leaf-shaped hands, the iconic Montblanc exploding star guilloché pattern as well as a unique railway minute track. The distinguished appearance is completed by the new slate grey dial with a new matching grey sfumato leather strap coming from the Montblanc Pelletteria.

Montblanc TimeWalker
The new TimeWalker Collection is inspired by performance and embodies the spirit of racing. This racing passion started in the early 20th century, when new engines and lighter car bodies led to faster speeds. As the winners were determined by the slimmest margins, the need for devices that could measure even the smallest intervals was more acute than ever. At the time, Minerva was one of the leading specialists in precise chronometry. From 1908 onwards, it was already successfully pursuing new technological challenges, such as the production of watches equipped with chronograph functions and highly accurate stopwatches that measured short intervals of time. The Manufacture developed stopwatches that could measure 1/5th of a second in 1911. And, in 1916, it became one of the first manufactures to develop a movement that could measure 1/100th of a second.

Minerva shaped the history of performance timing in a way that few other watch manufactures did, with its stopwatches present at legendary sporting events around the world. Paying tribute to this extraordinary heritage, Montblanc journeys back to the glory days of racing with timing instruments that capture the beauty, spirit and values of motor racing history. In the new TimeWalker Collection, these professional watches are reborn – enhanced with performance and further innovations. In all timepieces of that collection a discerning eye will find the Minerva arrow either on the hands or movement to pay tribute to Minerva’s heritage.
Every race is a journey.
Inspired by the famous Minerva Rally Timer stopwatch produced in the 1960s, the new Montblanc TimeWalker Rally Timer Chronograph combines a unique aesthetic with a “reverse panda” dial and the renowned handcrafted monopusher chronograph MB M16.29 calibre. The wristwatch, with its brand-new brown sfumato aged calf leather strap, can be easily converted into a pocket watch by simply folding the strap attachments under the case. The pocket watch can then be placed on a table, thanks to two arms below the case. It can also be used as a stopwatch with the strap as a handle or be clipped into a metal plate covered with leather that attaches to a car’s dashboard. The 50 mm case is crafted out of grade-two titanium and has been satin-finished. The middle section of the case has been knurled and coated with black DLC. It can be turned from 0 to 180 degrees (or from 3 to 9 o’clock) in both directions to allow perfect readability while driving. The racing codes also carry over onto the two-counter “reverse panda” dial with highly legible hands, indexes and chronograph functions. The chronograph’s 30-minute counter at 12 o’clock is vertically aligned with a small seconds subdial at 6 o’clock, reminiscent of the original Minerva Rally Timer.

The manufacture manually wound Monopusher Chronograph Calibre MB M16.29 itself consists of 252 components and is inspired by the 17.29 calibre from the 1930s. The calibre features fine watchmaking finishes that were completely crafted and bevelled by hand.

Montblanc TimeWalker Rally Timer Chronograph Limited Edition – 100 pieces

Ident No.: 118487
Movement type: Manually wound monopusher chronograph with tachymeter scale
Calibre: MB M16.29
Indications: Central hours and minutes – seconds at 9 o’clock
Case: Titanium, domed sapphire crystal with anti-reflective coating
Case back: Sapphire crystal case back
Dial: Reverse panda dial with black background and white counters, white Arabic numerals and luminescent red indexes
Hands: Luminescent rhodium-coated hours and minutes hands; red seconds hand; black rhodium-coated counters hands
Dimensions: 50 mm, 15.2 mm
Strap: Calf leather strap coming from the Montblanc Pelletteria in Florence, Italy
Water resistance: 3 bar (30 m)
Limitation: 100 pieces
Montblanc TimeWalker
Rally Timer
Chronograph
Limited Edition
The new Montblanc TimeWalker Manufacture Chronograph commemorates the golden age of motor racing with intricate details. It introduces a brand new Manufacture Automatic Chronograph movement within the TimeWalker line that comes with 3-6-9 counters. Regarding its aesthetics, the TimeWalker Manufacture Chronograph displays one of the most appealing designs that have ever been introduced in racing history: the “panda dial”. Thanks to its contrasting colours, this iconic display offers exceptional readability to the wearer. The TimeWalker Manufacture Chronograph comes with a vintage brown sfumato calf leather strap with perforated holes that is inspired by racing gloves. Its semi-skeletonised horns are inspired by the aerodynamic lines of classic car bodies. The case back is modelled on vintage alloy wheels and the smoked sapphire crystal showing the watch movement evokes the glass housing of V12 racing engines. In addition, the fixed black bezel with engraved tachymeter scale is made from high-tech ceramic to provide robustness and enduring performance.

The Montblanc Manufacture Chronograph Calibre MB 25.10 combines traditional finishing such as “Côtes de Genève”, circular graining and blue screws with a new monobloc oscillating weight made of black rhodium-plated tungsten – designed in the shape of a steering wheel to represent the spirit of racing. The movement is equipped with a traditional column wheel, a horizontal coupling as well as a stop-second mechanism, allowing the precise setting of the time. It shows hours, minutes, small seconds and date, as well as the chronograph’s indications with a central hand and counters at 3 o’clock and 9 o’clock, reminiscent of traditional 3-6-9 counter chronograph positions.
